

Transact – BlackRock MPS Growth 80

MPS exclusively available with Transact

As of date: 30 April 2026

Introduction

The Transact – BlackRock Model Portfolio Service (MPS) is managed by BlackRock Investment Management (UK) Limited ('BlackRock') as the investment manager and made available to retail clients through FCA-authorized advisers via the Transact platform, provided by Integrated Financial Arrangements Ltd (IFAL). IFAL is not the investment manager and is not responsible for determining the asset allocations within the models. Neither IFAL, or BlackRock are responsible for assessing whether the Transact - BlackRock MPS is suitable for individual clients, and you should contact your adviser for further information and advice.

This factsheet summarises the objectives, risks and underlying holdings of the Transact - BlackRock MPS Growth 80 model portfolio.

Capital is at risk and the value of investments and the income from them can fall, as well as rise. Returns are not guaranteed and may be less than the amount originally invested.

Growth 80 model portfolio snapshot

Launch Date: 6 September 2022

Fees

These are the investment fees you will pay for the Transact – BlackRock MPS. They do not include platform costs and additional charges from your adviser may also apply. Please refer to the glossary for full details of charges.

Ongoing Charges Figure (OCF)¹	0.19%
Fund Transaction Costs²	0.03%
Investment Manager Annual Payment³	0.06%

¹Source BlackRock as of 30 April 2026.

²Transaction costs are sourced from the underlying managers and updated periodically.

³BlackRock will pay IFAL 0.02% to cover part of its costs relating to the Transact – BlackRock MPS. This payment is included in BlackRock's IM Annual Payment fee.

Investment Objectives

This model portfolio aims to target long-term capital growth, whilst managing risk in accordance with a pre-defined risk profile, set out below. The model invests in a range of index tracking funds and Exchange Traded Funds (ETFs) which provide exposure to a broad range of markets, across multiple asset classes and currency exposures to offer a globally diversified solution with cost-effective ongoing charges.

Risk

Target Volatility Range

Each model portfolio in the range aims to target a different level of risk, which is measured by annualised volatility (standard deviation), a statistical measure of the expected variation in returns converted into an annual rate. The higher risk models have a higher expected volatility.

Performance

Growth of hypothetical £10,000 since launch:

Cumulative, annualised & calendar returns:

	Cumulative				Annualised		
	1m	QTD	YTD	1y	3y	5y	SI*
Growth 80	8.3%	8.3%	4.2%	26.1%	14.4%	-	11.9%

Glossary of Asset Classes

Alternatives – Investments that fall outside of the more conventional categories above such as commodities and precious metals like gold. The prices of commodities tend to experience greater variations than other asset classes (e.g., equities or fixed income securities). Investments in commodities are therefore potentially riskier than other types of investments.

Cash & Cash Equivalents – Highly liquid investments such as cash, foreign currency, money market instruments, and short-term bonds.

Currency Exposures – **GBP:** Great British Pound, **USD:** US Dollar, **JPY:** Japanese Yen, **EUR:** Euro, **CAD:** Canadian Dollar, **AUD:** Australian Dollar, **HKD:** Hong Kong Dollar, **TWD:** Taiwan dollar, **INR:** Indian Rupee.

Equities – Also known as stocks or shares – represent an ownership stake in a company. The company can choose to return value to investors by paying income in the form of a dividend. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political and economic news, company earnings and significant corporate events.

Developed Market Equity – Investment in companies in the developed World such as USA, UK and Europe.

Emerging Market Equity – Investment in companies in the developing world such as China and India.

Factors – Investment in companies that have favourable exposure to target style factors such as quality, momentum, size and value, that have historically outperformed the broad market.

Thematics – Investment in companies that give exposure to predicted long-term themes such as technological breakthrough, climate change and resource scarcity rather than specific geographies or sectors.

Fixed Income – Also known as bonds – are essentially an ‘I owe you’. Governments and companies borrow money when they issue bonds, then promise to repay it at the end of the bond’s life and usually pay a fixed interest payment each year. The two main risks related to fixed income investing are interest rate risk and credit risk. Typically, when interest rates rise, there is a corresponding decline in the market value of bonds. Credit risk refers to the possibility that the issuer of the bond will not be able to repay the principal and make interest payments.

Government bonds – Bonds issued by governments to raise capital.

Corporate Bonds – Bonds issued by companies to raise capital.

High Yield Bonds – Bonds issued by companies with lower credit ratings, offering higher returns to compensate for increased risk of default.

Stocks & Shares - See Equities

Glossary

Asset allocation – The percentage of your money invested in each asset class.

Asset class – A group of investments demonstrating similar characteristics, such as stocks & shares, bonds, alternatives, etc.

Discretionary Investment Manager – The organisation such as BlackRock managing and rebalancing the model portfolio.

Exchange Traded Fund (ETF) – A type of passive fund traded on stock exchanges that tracks and aims to replicate the performance of a specific index, such as the S&P 500 or FTSE 100.

Index mutual fund – A passive fund not traded on stock exchanges that invests in the same companies an index such as the S&P 500 is tracking, aiming to match its performance.

Long term – Five years or longer.

Minimum Investment – Our suggested minimum investment in this model portfolio is £10,000 as a single investment, or regular investments of £750. Note that regular investments of less than £750 are likely to result in higher levels of uninvested cash in your account on Transact, so, such amounts should only be considered when you have already invested £10,000 in the portfolio. We suggest that you maintain at least

£10,000 in this investment to enable an effective asset allocation. Your adviser is best placed to advise you on how much to invest in your circumstances.

Model portfolio – A customised portfolio containing different investments brought together to achieve a specific objective, created by an investment management team such as BlackRock.

MPS – Model Portfolio Service.

Rebalance – Adjusting the target allocations of the model portfolio, performed to maintain set objectives.

Risk – The possibility that your investment will make losses and go down in value; note that all investments can suffer losses.

Sector – The type of business activity in which your money is invested, e.g. utilities, mining, healthcare, technology.

Short term – In the near future, less than five years.

Volatility – A measure of how much the price of an investment fluctuates around its average price; this is commonly used to gauge investment risk.

Charges Explanation

Ongoing Charges Figure (OCF) – the total annual charges and operational expenses associated with the management of the underlying funds in the model portfolio.

Transaction Costs – costs associated with carrying out transactions of underlying assets within the funds in the model portfolio on the Transact Platform.

Investment Manager Annual Payment – the annual charge for the management of the portfolio. The charge will be deducted from clients’ portfolios once a month and paid to BlackRock Investment Management (UK) Limited. BlackRock will pay IFAL 0.02% to cover part of its costs relating to the Transact –BlackRock MPS.

Important information

This Transact – BlackRock MPS Fact Sheet is produced by IFAL.

This Fact Sheet is for general guidance only and should not be viewed as a recommendation to use or rely on any features contained herein. It does not, and is not intended to, constitute or substitute professional advice. For further details please speak to your financial adviser.

As with all investments, your capital is at risk. The value of investments and any income derived from them will vary and you may not get back your original investment.

Past performance is not a reliable indicator of future results.

The value of overseas investments may be adversely affected by changes in exchange rate.

The tax treatment of your investments is dependent on your personal circumstances and may change in the future.

Changes in interest rates may impact the value of fixed interest investments held, and the value of your investment may be impacted if the issuers of underlying fixed interest holdings default, or market perception of their credit risk changes.

There are additional risks associated with investments in emerging or developing markets.

Any advice with respect to investment in the model portfolio and the suitability of the investment objectives of the model portfolio for you is provided only by your financial adviser. BlackRock does not provide any investment advice to you and has not considered the suitability of the model portfolio against your individual needs, objectives or risk tolerances. BlackRock's role as discretionary investment manager is to rebalance the Transact - BlackRock MPS models in line with their investment objectives. The execution and settlement of trades to implement the model portfolio in the relevant portfolios of investors is solely carried out by Transact.
