Creating more value for families

Creating more value for families with family linking

For many people, their financial plan will be centred around their family's financial future.

Whether you're saving for your children's university fees, planning for retirement or considering how to pass down wealth efficiently, Transact can help you and your financial adviser with your family's financial goals.

As well as ISAs and Pensions, Transact offers products designed specifically for children, including Junior ISAs and Junior Pensions. Plus, our Onshore and Offshore Bonds and range of Trusts can be used for tax and estate planning, to maximise the amount of money that can be passed tax-efficiently to your loved ones.

Complementing these services is our family linking option, which helps support families who are looking to invest.

Family linking gives you the ability to link the assets your family holds with Transact to potentially reduce the platform charges your family pays. This is part of our responsible pricing policy, where we lower our charges over time, as our business grows.

How family linking could benefit you

- ✓ Potential reductions in platform fees for all linked family members.
- ✓ More money remains invested that could benefit from growth.*
- ✓ Makes investing more cost-effective for family members with less to invest.

*The value of investments can fall as well as rise. Tax treatment depends on individual circumstances and may be subject to change.

How does family linking work?

When a link between family members is established, we use the value of the total linked assets when calculating the annual platform charge you pay for your Transact Portfolio.

As our annual charge is tiered, and the charge rate reduces the more you invest, family linking can potentially reduce the annual platform charge rate that you pay.

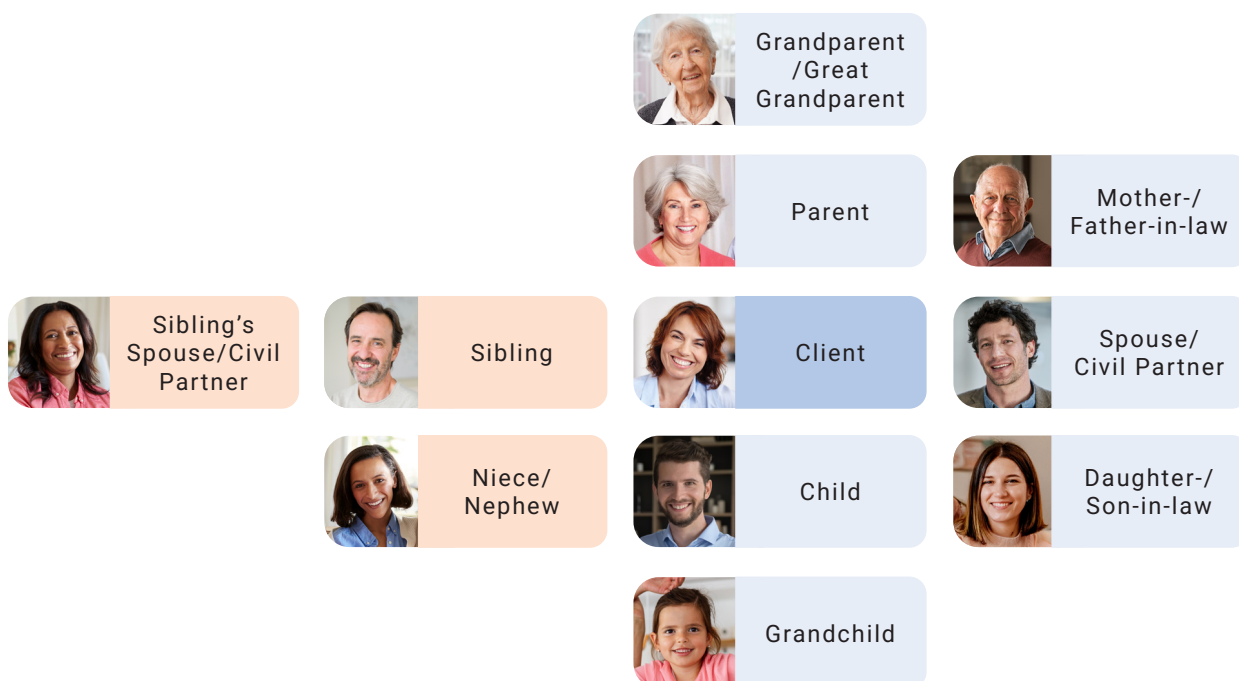

The wrapper fee we charge for each of the Personal Pension and SIPP wrappers is shared between clients in a family linked group where the same wrapper is held more than once.

Each of the JISA, Personal Pension or SIPP wrapper fees are waived for clients under the age of 18.

Who can be linked

Our extensive family linking means you can link a wide range of relationships, to form a single, family group, potentially linking up to six generations or more. We will also consider linking other close family members and Corporate, Trust or Third-Party clients upon request, where we deem there to be an appropriate relationship with the client and family group. More information on linking these types of portfolios is available from your financial adviser.

The image below shows how a family group can be linked from the client at the centre. Family members highlighted in orange will be available for family linking from 1 April 2026.

Example 1*

£850,000 total portfolio value

By linking their individual portfolios using family linking, the family's assets are combined to £850,000 when calculating the charge rate they pay. This has the effect of reducing their combined charges by a total of £585 or 23%. As Mrs Miggins' daughter and niece are both under 18, they would also pay no wrapper charges for their investments, if they hold a personal pension, SIPP or Junior ISA.

						
	Mrs Miggins	Mr Miggins	Mrs Miggins' son	Mrs Miggins' son	Mrs Miggins' daughter	Mrs Miggins' niece
Investment value	£500,000	£190,000	£60,000	£70,000	£20,000	£10,000

Total annual charge	£2,570					

Charges with family linking						
Total linked portfolio value of £850,000 is used to calculate an equivalent family charge rate. (£600,000 charged at 0.26% and £250,000 charged at 0.17% = £1,985) Equivalent rate = £1,985/£850,000 x 100 = 0.23%
